Re: Juneau Hydropower, Inc., Sweetheart Lake Hydroelectric Project, FERC Project No. P-13563 Section 106 conclusion of the identification process

Dear Ms. Bose,

Juneau Hydropower, Inc. (JHI) has published a draft and final cultural studies report as a component of the Section 106 process. In our Sweetheart Lake Hydroelectric Project (Project) cultural studies work group consisting of federal, state, and Native American Tribes, questions arose related to the archaeological survey intensity and methodologies employed for the examination of the Project.

I am filing the JHI Archaeologist confidential report conducted by our contract archaeologist, Mark Pipkin that is intended to resolve all matters related to the identification process.

Our recommendations for eligibility and determination of no effect are listed in our final cultural studies report. Now that we are concluding the identification process, I would like to move the process to begin the conclusion of the eligibility determination of the Section 106 process. A copy of this letter and report will be provided to the agencies involved and to the Douglas Indian Association.

Respectfully Submitted,

A handwritten signature in black ink, appearing to read "Duff W. Mitchell", written over a horizontal line.

Duff W. Mitchell
